Neoprene CR Rubber Sheetting – Commercial Grade

Product Overview

Neoprene (CR) rubber sheetting is a premium synthetic elastomer offering excellent resistance to weathering, ozone, ageing and moisture. It is widely used for industrial gaskets, roofing, seals, vibration pads, scraper blades, protective linings, sleeves and general engineering applications. It provides moderate resistance to oils, greases and many chemicals while maintaining flexibility over a broad temperature range.

Key Benefits

- Excellent resistance to ozone, UV and weathering
- Suitable for indoor and outdoor applications
- Good flexibility and durability
- Moderate resistance to oils, greases and chemicals
- Smooth finish on both sides
- Easy to cut, fabricate and install
- Long service life in commercial and industrial environments

Typical Applications

- Industrial gaskets
- Expansion joints
- Scraper blades

- Protective linings
- Anti-vibration pads
- Marine applications
- Automotive sealing
- General engineering

Technical Specifications

Property	Value
Material	SBR/CR 10% Polymer
Surface Finish	Smooth both sides
Colour	Black
Hardness	65 Shore A ± 5
Working Temperature	-20°C to +80°C
Tensile Strength	5 MPa
Elongation at Break	260%
Specific Gravity	1.35 ± 0.05 g/cm ³
Length	20m
Available Thickness	1.5 mm, 3.0 mm, 6.0 mm
Roll Width	1.20 m

Storage & Handling

Store in a cool, dry location away from direct sunlight and ozone-producing equipment. Avoid prolonged contact with aromatic hydrocarbons and ketones.

PVC Floor Tile

Factory-direct rubber sheeting and flooring solutions for commercial and industrial applications. Bulk orders and nationwide delivery available.
